Education

Thadomal Shahani Engineering College, Bandra 2024 - 2027
Bachelor of Engineering in Computer Engineering — CGPA: 9.35

Vidya Prasarak Mandal's Polytechnic, Thane Oct 2021 – June 2024
Diploma in Information Technology — Grade: 93.63

Experience

Backend Development Intern March 2025 – July 2025
Bargenix AI *Remote*

- Developed backend APIs for the Bargenix dashboard, integrating with Shopify REST APIs for inventory and product analytics using RESTful APIs.
- Implemented secure endpoints for product, inventory, and discount data synchronization, optimizing backend services for real-time data visualization on the dashboard.
- Built automated data pipeline for processing Shopify webhooks, ensuring real-time inventory updates enabling real-time inventory synchronization for Shopify stores.
- Optimized database queries and implemented caching strategies, reducing API response time by 40% for large-scale product catalogs.

Web Team Head April 2025 – Present
TSEC Devs Club *Mumbai, Maharashtra*

- Leading team of 4 members using Agile methodology to deliver web development projects for the college development club.
- Redesigned landing page UI with modern design principles, improving user engagement and visual appeal.
- Built automated utilities for timetable and student data entry with form-based interfaces that generate JSON and push to Firebase, eliminating manual data entry processes.

Projects

HireZaa: AI-Powered Recruitment Platform | *Javascript, Firebase, Gemini API, Deepgram, Judge0* | Live Demo

- Built full-stack recruitment platform with automated resume screening, parsing skills and profile links to enabling AI-assisted candidate shortlisting based on extracted skills and job requirements..
- Developed secure online assessment engine with question randomization, integrated Judge0 compiler for live coding, and anti-cheating mechanisms including tab-switch detection.
- Integrated Gemini API for assessment analysis and AI mock interviews using Deepgram for real-time speech-to-text transcription.

Droply - Distributed Cloud File Storage System | *Node.js, Express.js, PostgreSQL, Redis, AWS S3, RabbitMQ*

- Designed scalable cloud storage backend supporting chunked file uploads, resumable uploads, and direct client-to-S3 transfers using pre-signed URLs.
- Built event-driven architecture using RabbitMQ with dedicated workers for file assembly, deduplication, and version management.
- Implemented secure download flow with permission checks, Redis-based caching, storage quota enforcement, and real-time upload notifications via WebSockets.

Prodify - Product Management Dashboard | *React.js, Node.js, Express.js, MongoDB, Shopify API, JWT*

- Developed admin dashboard with React frontend and Node.js backend, implementing MongoDB storage and real-time Shopify API synchronization with JWT-based authentication.
- Designed RESTful APIs for CRUD operations and product syncing, enabling efficient inventory and product management workflows.

Achievements

- Strong problem-solving skills demonstrated through consistent practice on LeetCode and data structures & algorithms.
- Runner-up at Rubrix Hackathon, a 48-hour competitive hackathon organized by CSI TSEC
- Finalist at Need for Code 3.0, a 24-hour hackathon organized by CodeTantra, TSEC Mumbai (2025)
- Finalist at HackSync, a 24-hour hackathon organized by GDG TSEC.
- Winner of State-Level Project Competition at Government Polytechnic, Thane
- Active participant in multiple hackathons, ideathons, and technical competitions including IndiaSkills Competition 2024

Technical Skills

Languages: Java (Primary), C, SQL, JavaScript,HTML,CSS

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Mongoose, REST APIs

Databases: MongoDB, MySQL, cloud firestore

Tools and cloud : Git, VS Code, Redis, RabbitMQ, AWS S3, Firebase Authentication, Vercel, Render

System Design & HLD: API Design, Caching, Event-Driven Architecture, Message Queues, Scalability, Load Balancing, Database Indexing
